

MHQP Preventive Care Guidelines

Massachusetts Health Quality Partners (MHQP), in collaboration with Health New England and other health care organizations across Massachusetts, is proud to release updated editions of its statewide Adult and Pediatric Preventative Care Guidelines. The Preventive Care Guidelines can be viewed on or downloaded from [MHQP's website](#). If you need a paper copy of the guidelines, please contact HNE member services at 413-787-4004 or 800-310-2835.

Since 2001, MHQP has been working with health care organizations across the state to produce and endorse a single set of statewide, routine primary care guidelines to eliminate the use of multiple and inconsistent guidelines to better support clinician efforts to provide high-quality, evidence-based care.

Also on the website is a list of helpful resources for use in primary care practices, including clinician tools, patient materials, and resources referenced while producing these recommendations.

For further information about MHQP's guidelines, visit www.mhqp.org or email info@mhqp.org.
